0-WEB.ru

The scenery varies from verdant summer meadows to bare mountain crags, and from Swiss-style chalets to chalets formed from pine and slate. The system's popularity has pushed the rail company to add new assets, including bridges and signal boxes. Download all of the scenery you need to create a stunning backdrop for your journey, including Austria, Italy, and Switzerland. Train Simulator - Spa Railway is available to download from Steam at a discount. **SIMULCAST Mention of steam train activity is generally permitted on these channels, however some broadcasters have been known to take action and can remove content. It is the responsibility of the user to ensure any content is suitable for all ages. Steam Train Game Channels are not responsible for the content broadcast.**Q: Segmentation fault when loading c library from shared object I have a small C library that takes a main function and uses it to call some C functions in a Qt application. I would like to have this shared library in a.so, so I tried to create a.so with the standard GNU LD linker as follows: gcc -c -fPIC -o libmylib.o mylib.c gcc -shared -o mylib.so mylib.o I then compiled my libmylib.so into mylib.so.1.0.0 like this: gcc -O2 -g3 -fPIC -fvisibility=hidden -Wl,-soname,libmylib.so.1 -Wl,-rpath,/usr/local/qwt-3.1/lib -Wl,-rpath,/usr/local/qwt-3.1/lib/libQwt5.0.0 -o mylib.so.1.0.0 mylib.c To test, I tried to run the library by doing this: gcc -o qtest qtest.c libmylib.so Then, when I run this, I get a segmentation fault. I have traced it back to libmylib.so.1.0.0 and line 100 in that library is this: #include "libmylib.h" There's a whole bunch of library functions that I want to call in the Qt application, but I just left out the one that causes the segfault 82157476af
